

Pilates & Your Health

FROM INJURY RECOVERY TO EVERYDAY WELLNESS

What is Pilates exercise training?

Pilates is a precision-based movement method that builds core strength, improves posture, and enhances breath control. By aligning your body to move more efficiently, it reduces pain and boosts daily performance. With PREHAB DigiCare, you can master these clinical fundamentals from the comfort of your home through expert-led online training.

When can I consider Pilates exercises, & who can practice?

Pilates is for everyone—from desk professionals to elite athletes. It is the perfect solution for back pain, post-surgery recovery, or improving general fitness. Because it requires minimal space, it is the easiest way to jumpstart your fitness journey at home via DigiCare's online training.

How does Pilates help with low back pain and recovery after spine surgery?

It activates deep core muscles to support a neutral spine, taking the pressure off your discs. PREHAB clinical experts guide you through safe, corrective movements online, ensuring your recovery is fast, effective, and supervised if need digitally.

Pilates & Your Health

FROM INJURY RECOVERY TO EVERYDAY WELLNESS

Why is Pilates beneficial during pregnancy & after delivery?

It strengthens the pelvic floor and supports the extra weight of pregnancy while easing back strain. Post-delivery, it is vital for restoring abdominal strength (Diastasis Recti). DigiCare provides a safe, private environment to exercise at home, keeping you and your baby healthy without the stress of travel.

How long should I do Pilates to see results?

You'll feel the difference in your posture and energy almost immediately! For clinical recovery, significant progress usually happens within 6–8 weeks. Consistency is key—and DigiCare's 1-on-1 virtual coaching makes it easy to stay on track and hit your goals faster.

Is it difficult to start Pilates at home?

Not at all! Pilates is arguably the most accessible exercise to start virtually. You don't need heavy gym equipment—just a mat and a screen. PREHAB DigiCare brings elite clinical instruction to your living room, making starting today easier than ever.
